## Construction Supervision

## Structural design

Sidercad is glad to offer students tutoring and technical support during thesis projects and training internships in the field of structural engineering and design. The main focus will be on:

- ▣ **finite element modeling** of above-ground steel or reinforced concrete structures or foundations
- ▣ carrying out verifications according to **national and international standards**
- ▣ Students will have the opportunity to use the best industry software and be **guided and trained by professional engineers**

## Computer aid design

Sidercad is glad to offer students tutoring and technical support during thesis projects and training internships in the field of CAD design and BIM modeling. The main focus will be on:

- ▣ learning the rules of BIM modeling
- ▣ using the best and most widely used commercial software
- ▣ Students will benefit from our decades of experience in this field
